Sunlighten Infrared Purification Room

What is Infrared?
Infrared light (experienced as heat) is the invisible part of the sun’s spectrum with the ability to penetrate human tissue, giving a soothing, natural warmth. The Sunlighten infrared technology is therapeutic because it is 95%-99% efficient at heating the body directly rather than simply heating the air. It works to raise the core body temperature to produce a deep, detoxifying sweat at the cellular level where the majority of toxins reside. Sunlightens Full Spectrum is unique in it’s ability to provide near, mid, and far infrared light.

Infrared Therapy Health Benefits

**Detoxification** - Detox from our Sunlighten sauna is 7 to 10 times greater than a conventional sauna.

**Pain Relief** - Relieve back, neck, and arthritis pain.

**Weight Loss** - A 30 minute session can burn up to 200 - 600 calories!

**Lowers Blood Pressure** - Studies show a 30 minute session 3 times a week can lower blood pressure.

**Improves Circulation** - Heating of muscles with infrared produces an increased blood flow similar to that seen during exercise.

**Skin Purification** - Improve your skin’s appearance with regular sauna use.
